Hi Bri,

I won't bother with an addendum than. My concern was with the original intent of the sponsor to "get as many credits as possible" for acres of waters from the alluvial fan by considering the entire fan surface area. I agree with the approach that Aaron is taking to limit the amount to 5.5 acres consistent with impact JDS.

Thanks and good luck with getting your letter out.

Paul

Thanks Paul!! Unless you can get the addendum to me in the next few hours I wouldn't worry about it. I'm really trying to get this letter in for review/out to them today. do you mean the entire 5.5 acres of alluvial fan credits that Aaron said we would give them?

Hi Bri,

No worries. My comments are attached. Some of them have been addressed already so I really should have spent some time updating them. And unfortunately, they say nothing about my concerns with the sponsor's proposal to generate WOUS credits for the entire alluvial fan acreage. This came up at a later time and I just didn't catch it when I referenced my old comments. If it would help, I can spend some time updating my Elizabeth Lake property comments and send you an addendum. Let me know.

Paul

Hey paul,
I can't find your previous Elizabeth lake comments submitted on 7/18/13. I'm thinking they were sent to Shannon but I don't see them anywhere in my saved emails for the project. I will go check with her but it may be easier for you to just forward to me if you have them saved. Sorry about that!

Bri

Hi Bri,

Thanks for accepting EPA's comments on the Petersen Ranch Final Prospectus a few days late. Following my visit to the site and reviewing the details in the Prospectus I don't really have a lot to comment on at this point in time. Because the document states that the Elizabeth Lake portion has not changed, I did not bother revising those comments, submitted on July 18, 2013, even though some of them have already been addressed through discussions on the IRT calls.

Thanks and have a nice long weekend!

Paul
